

### Patient friends and family feedback for March 2025

These responses were collected from the friends and family test results and from feedback forms provided in the surgery and after appointments. All patients receive the friends and family survey via text message after their appointment at the surgery.

We had some supportive messages from patients in April, sending thanks and well wishes for the continued hard work that we provide to our patients. They wanted to take the time to thank our admin, nurse and doctors for providing 'fantastic' service and hard work.
